

I found some Chicken mince in the discount fridge a week or so ago which has been loitering in the freezer. We've been a bit busy DIYing recently and not posted many recipes, but this has to be worth typing up before I go move a friend. Sue and I have both done a stretch at the well known Burger joint that sell reformed Chicken ?Breast? sandwiches with Mayo and Lettuce. We thought we'd improve on that basic foundation??

The Burger Buns are Gluten free. The recipe is here -

We served ours with thick hand cut chips and Tomato sauce. We'll be eating left over Burger for most of the day, but these were really good and well worth the effort! Realistically the quantities would easily have fed a family of four.
